Magnetostrictive level transmitter
Flexible version
Model FLM-Tx-FLEX

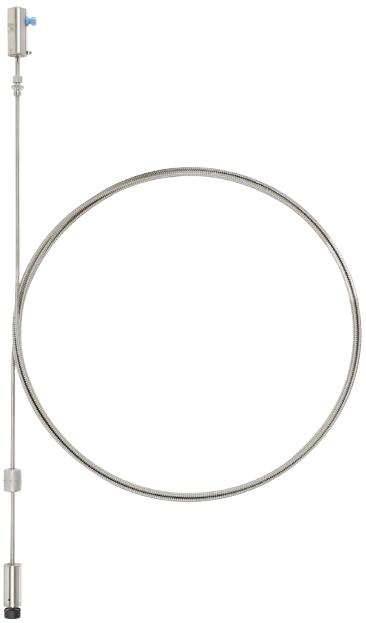
For approvals, see page 4

Applications

- High-accuracy level detection for almost all liquid media
- Particularly suited for large storage tanks
- Advantageous for installation situations with limited ceiling clearance
- Chemical, petrochemical industry, natural gas, offshore, shipbuilding, machine building, power generating equipment, power plants

Special features

- Probe length 1,500 mm … 22,000 mm [59.06 ... 866.14 in]
- High accuracy of ± 2 mm [± 0.08 in] over a wide measuring range
- Very high resolution of < 0.1 mm [0.004 in]
- Explosion-protected versions possible



Level transmitter in flexible version, model FLM-TAI-FLEX

Description

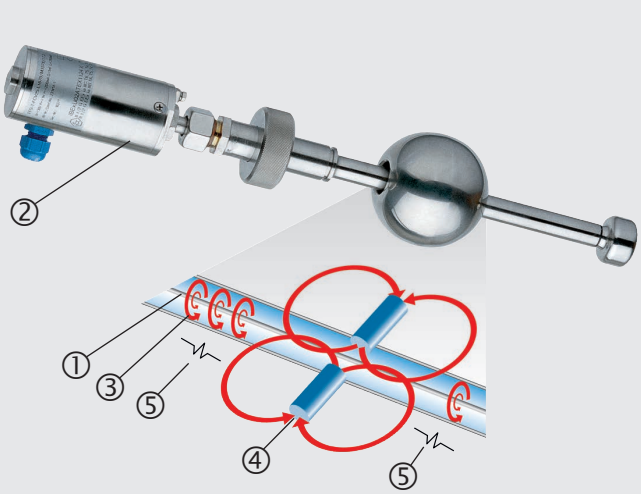
The model FLM-Tx-FLEX magnetostrictive level transmitter is used for high-accuracy, continuous level detection of liquids, also with long insertion lengths.

The model FLM-Tx-FLEX is fitted with a flexible probe tube in the form of a stainless steel spiral armour.

At the lower end of the sensor, there is a magnetic foot, which serves both to fix the stainless steel corrugated tube to the tank floor and as a ballast weight. Due to the flexible probe tube, the FLM-Tx-FLEX has an advantage in installation in applications with low ceiling clearances. Transport, due to the flexible design, is also easier than with a rigid probe. Interface measurements are also possible with the flexible version.

Specifications

Functionality



Design and operating principle

- The measurement process is triggered by a current impulse. This current produces a circular magnetic field ③ along a wire ① made of magnetostrictive material which is held under tension inside the corrugated tube.
- At the point being measured (liquid level) there is a float with permanent magnets ④ acting as a position transducer.
- The superposition of these two magnetic fields triggers a mechanical torsional wave ⑤ in the wire.
- This is converted into an electrical signal at the end of the wire in the sensor housing ② by a piezoceramic converter.
- The measured propagation delay enables the origination point of the mechanical wave, and thus the float position, to be determined with high accuracy.

⑤ Torsional wave

Overview of versions

Model	Display	Electrical connection	Ex version
FLM-TA-FLEX	Without	Cable gland	-
FLM-TAI-FLEX	Without	Cable gland	Ex ia
FLM-TM-FLEX	Without	M12 connector	-
FLM-TMI-FLEX	Without	M12 connector	Ex ia
FLM-TB-FLEX	LC display	Cable gland	-
FLM-TBI-FLEX	LC display	Cable gland	Ex ia
FLM-TBD-FLEX	LC display	Cable gland	Ex ia/db
FLM-TH-FLEX	LC display with integrated heating	Cable gland	-
FLM-THI-FLEX	LC display with integrated heating	Cable gland	Ex ia
FLM-THD-FLEX	LC display with integrated heating	Cable gland	Ex ia/db

Basic information		
Connection housing		
Material	Stainless steel 1.4305 (303)	
Sensor tube		
Material	Stainless steel 1.4571 (316Ti)	
Diameter	12 mm [0.47 in]	
Length from top to start of flexible corrugated tube	500 mm [19.69 in]	
Length from bottom to start of flexible corrugated tube	500 mm [19.69 in]	
Corrugated tube		
Material	Stainless steel 1.4404 (316L)	
Diameter	12 mm [0.47 in]	
Insertion length	1,500 ... 22,000 mm [59.06 ... 866.14 in]	
Accuracy specifications		
Level	±2 mm [±0.08 in]	
Resolution (HART®)	0.1 mm [0.004 in]	
Process connection		
Thread size	Mounting thread	■ G ½ ... G 2" ■ ½ NPT ... 2 NPT
	Mounting flange	■ DIN EN DN 50 ... DN 200, PN 6 ... PN 100 ■ ANSI 2 ... 8", Class 150 ... 600
	Height-adjustable bite-type fitting	
	→ Other thread sizes on request	
Output signal	4 ... 20 mA / HART® version 6	
IP ingress protection	IP68	
Electrical connection		
Connection type	2-wire	
Cable diameter	5 ... 10 mm [0.2 ... 0.39 in]	
Supply voltage	8 ... 30 V DC	
Electrical output	■ Cable gland M16 x 1.5 ■ Cable gland M20 x 1.5 ■ M12 connector ■ ½ NPT thread for conduit wiring	
Operating conditions		
Ambient temperature range	-40 ... +85 °C [-40 ... +185 °F]	
Storage temperature range	-40 ... +85 °C [-40 ... +185 °F]	
Process temperature	-40 ... +85 °C [-40 ... +185 °F]	
Other versions	■ Interface measurement, with two floats ■ Temperature sensors ■ Pharmaceutical design, FLM-H ... -FLEX, up to 150 °C [302 °F]
